DOCUMENT PROCESSING MADE EASY

We are a global leader in the development of document scanning,
file conversion and imaging software.

We develop applications that are powerful yet easy to deploy, configure and use.

With seamless connectivity into products like Microsoft SharePoint, HP Records Manager, Alfresco and a world of other solutions, we provide a powerful platform to build your document imaging requirements around. The speed and accuracy in document processing that our products deliver, allow your business to access information quickly and easily.

Extract Data

Professional batch scanning for medium to large organizations who need to scan, index and store documents quickly and easily. Documents can be profiled at the desktop, on a supported multifunction device or on your tablet/mobile.

Convert Formats

Automated conversion of a wide range of file formats into a unified file name and file format without requiring user intervention. After being converted, separated and cleaned, documents can be routed to multiple destinations simultaneously.

Mobile and Tablet

Photograph a document, a barcode, your environment or a situation then profile it ready for exporting to a unified destination. Work offsite, then sync when you're back at the office. A fast and effective way of making use of all those photos stuck on your mobile device.

At the MFP

Select your job, scan your documents, extract their data and profile their details all at the multifunction device. Set levels of automation so you only have to view the necessary information. Fast, easy and efficient!

Scanning and profiling documents directly at a multifunction device can provide significant efficiency and productivity benefits in your office environment.

"It only took about half an hour of training for us to learn how to use the software. It really is that easy to use!"
